Fall 2008 Construction Update

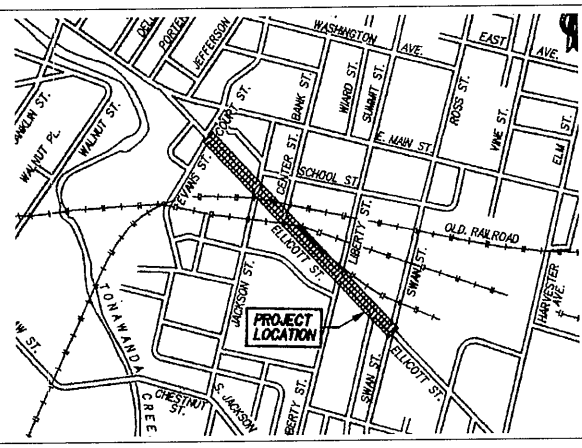
Ellicott Street Streetscape Improvement Project

Project Description

- **Streetscape improvements between the Evans Street / Court Street intersection and the Swan Street intersection (total length of 3150 feet).**
- Project Includes: enhanced landscaping & tree planting, sidewalk improvements, installation of concrete paver and color coded concrete sidewalks in select areas, granite curb "bump out" in select locations, relocations of traffic signal controls and adjustments to drainage structures as necessary.

Current Construction Activity

- Construction activities started 9/8/08
- Construction survey / layout
- Catch basins
- Pavement cutting for Bump outs
- Drainage modifications (South side)
- Maintenance of Traffic



Upcoming Construction

- Generally, all construction activities will commence on the South side of the street through mid October and then continue on the North side through the first week in November
- Utility relocations
- Bump out construction

General Comment

- Two way traffic will be maintained throughout the project with intermittent parking lane restrictions.
- The project is currently progressing *on schedule*. The project should be completed by November 8, 2008, weather dependent.
